Love the Space Pilgrim series and the first year Space Pilgrim Academy. Excellent! Hope there is more to come.  
. Rage quit simulator, there's achievements for dying it's that difficult..... Had to buy a new keyboard to play other games, came back to this one, had to buy another keyboard.....

10/10 would break keyboard again. Surprisingly great! Among the tightest platforming controls I've ever experienced. I usually find this kind of game (flow platformers, such as N+ or Supermeatboy) to be really hard to be good at but moving in this game feels so natural. I "got it" almost right away and could react and overcome tricky jumps the very first time I encountered them.

This feels like how the Strider remake looked like it felt.

Also, impressively violent kill animations!. There was a child at the age of .5 as a captain of a battleship.

'Nuff said.. Now if only this game had cutting physics.. Better collision, and less stupid scenarios where you have 3 people surrounding you (This would be fine if it was Full-Dive VR, but due to how clunky our current VR Is, it's basically a fight against your cable and your surroundings to even turn around rather than those 3 guys you're trying to perfect strike but fail to understand how to properly land one) this game would be perfect, oh and a bigger map. If you can even call this a "map".

If you used this fighting and implemented it into a decent stat point traditional RPG, it'd be perfect.

Also different opponents with different fighting styles would be nice. Wouldn't it be nice to fight a cat warrior who keeps jumping around and stuff in really flashy ways, or a huuuuge muscly tank guy.

A skilled Swordsman.

A puny woman with a dagger..

Etc.. Not just a bunch of masked big dudes that don't even get cut and just die out of bleeding after hitting them enough times.. Really average, you should stick to Max Payne who is clearly the inspiration for this game.

It was fun for a while though and I did finish the whole thing.

Buy it only if it is on sale and really cheap.. I'm sorry but i'm not into that♥♥♥♥♥ ilmao

I received a review copy of this and have been playing it for a few weeks. It's a fun concept for a game and I like the management of my colony that I have to feed, groom, keep them healthy and even entertain them with toys. The breeding part is good although I'm still getting up to speed with creating the ultimate beetle warrior as man some of those spiders are tough. The developer is responsive and even recently just taken time to comment on my video with some tips and advice about the UI.

There are regular updates to the game that so far have added extra levels, changes to the ui and even how the graphics for the beetles look.

I'd recommend it as it's a fun game and well worth the price

If you want to see some of the game in action and watch me do missions and breed check out my series.

. At least the splash screen looks cool.

This is a game where you play as a crow. As the only game with this feature, there is some reason to play it.

This game is worth about three dollars. It's a little different, and a little fun.. Well, this thing worth even at full price because it is not that expensive.

If you like Nekopara series then you shall watch this one or play Nekopara Extra. because who don't want to watch the adorable catgirls when they are still kittens.

Although I wish the video is longer tho. (or become a series instead)

No op song, only have ending song I sad >.<. I can't open this game after the March update. It is a great and nostalgic game for the fans of deep strategy games. Graphics are of course outdated and not promising so much but atmosphere is fantastic. If you like old strategy games from times when "strategy" really important to win, this game is for you! Buy, play and enjoy!. She's a nice character but i was suprised by the fact that she was stronger than Nep when i got her. way behind in lvl's too... If you're a Stan Sakai fan and you want to spend a little time playing pretend Usagi? Buy this game on your phone. Even as a big Yojimbo fan, I can't in good faith tell people to buy the pc version of this mess. Everyone else? There are better ways to spend 4,99.. Beautiful. Just beautiful. I have not seen such an intelligent way of telling a story with characters so rich in humanity.

To put pride, greed, fear, jealousy in the characters and at the same time justify these emotions as "just human", is out of pure genius.

10/10.. all i usually do is pretend to jerk off my stick man.
